

IN THE SPECIFICATION

Please **REPLACE** the paragraph beginning at page 1, line 26 and ending on page 2, line 5, as follows:

FIG. 4 is a block diagram showing ~~a structure~~structures of a ~~known~~ storage apparatus (a storage controlling apparatus) and for the description of the related art, FIG. 4 is discussed with respect to known structures of the storage apparatus. A storage apparatus 1 shown in FIG. 4 writes data from a server (a host) 4, and reads data requested by the server 4 and transfers the data to the server 4 in response to an access from the server (host) 4.

Please **REPLACE** the paragraph beginning at page 24, lines 9-21, as follows:

For the description of the preferred embodiments, FIG. 4 is discussed with respect to storage apparatus structures according to an embodiment of the present invention and the embodiment storage apparatus structures are denoted by reference numbers including the character "A." In FIG. 4, a A-storage apparatus 1A according to an embodiment of this invention has basically almost a similar structure to that of the known structures of the storage apparatus 1, ~~as shown in FIG. 4.~~ The storage apparatus 1A according to this embodiment writes data from a server 4, or reads data requested by a server 4 and transfers the data to the server 4, in response to an access from the server (host) 4. The storage apparatus 1A comprises a disk enclosure 2 having a plurality of disk units (physical devices) 2a, and a storage controlling apparatus 3A disposed between the disk units 2a and the server 4 to control an access from the server 4 to each of the disk unit 2a.
